# An Innovative Cooling Jacket to Combat Heat Intolerance in Children with Anhidrosis.

Inamadar AC<sup>1</sup>, Palit A<sup>1</sup>, Khurana N<sup>1</sup>.

## Author information

### Abstract

Hyperthermia and heat intolerance are distressing symptoms in patients with anhidrosis. Body cooling devices are an integral part of management of these patients. A cooling jacket made from easily available materials has been invented for a girl with congenital insensitivity to pain and anhidrosis with severe heat intolerance. This innovative cooling jacket may be helpful for anhidrotic children in resource-poor situations.
