Seroprevalence of hepatitis A virus antibody in Bijapur, Karnataka

[C P Rath, Arvind Akki, S V Patil, S S Kalyanshettar](#)

PMID: 21317475

Abstract

We studied the seroprevalence of anti-HAV IgG in children of Bijapur a tier III city/backward district in Karnataka and its relation with sociodemographic parameters. Out of 142 children, 6 months to 15 years who were included, 63 (44.4%) were sero positive, suggesting that Bijapur is a low endemic area.
