About this book About the authors

This book discusses emerging issues concerning ageing in India, describes the multi-layered vulnerabilities of older adults in the context of health care and caregiving, and explores social, legal and economic perspectives. It also analyses the existing policies and programmes intended to address these age-related issues and assesses the importance of preventive geriatrics towards active ageing, as well as the current scenario of institutional care for the elderly in India. *Catherine fifteen rhantare written by leardfin*
